Timetable Template
for
MBBS PHASE III PART I
As per

Competency-Based Medical Education Curriculum

Introduction

The timetable template given below for MBBS Phase III Part I, has been developed based on the teaching hours prescribed by NMC in the GMER 2019 document. The primary subjects of this phase are Community Medicine, Forensic Medicine and Toxicology, Ophthalmology and Otorhinolaryngology as the University exams in these subjects are scheduled at the end of this year.

As per the new curriculum the number of hours for didactic lectures have been reduced and proportionally the time for small group teaching learning methods like tutorials have been increased. In the time allotted for SGD, integration both horizontal and vertical should also be included. Other subjects like Respiratory medicine, Radio-diagnosis, Anaesthesia, Psychiatry and Dermatology need to be completed in this year and accordingly time has been allotted. There are 5 AETCOM modules of 5hours each (25hourhours) to be completed in this year and need to be scheduled.

The clinical postings in MBBS Phase III, Part I should be 18hours per week, 3hours/day Monday to Saturday. The Learner-doctor method of teaching should be incorporated during the clinical posting time.

The timetable given below is a suggested Template. The timetable has been constructed as weekly blocks. It takes into account time for the mandated 3sets of internal assessments, both theory and practical's. Each institution can plan the timetable, including the scheduling of allotted time for each subject based on institutional logistics, while fulfilling the recommendations in GMER 2019, as shown in the Table.
